

The most widely verified, accepted and sought-after manufacturer & suppliers of filters in the vehicle industry

PROWESS INDUSTRIES

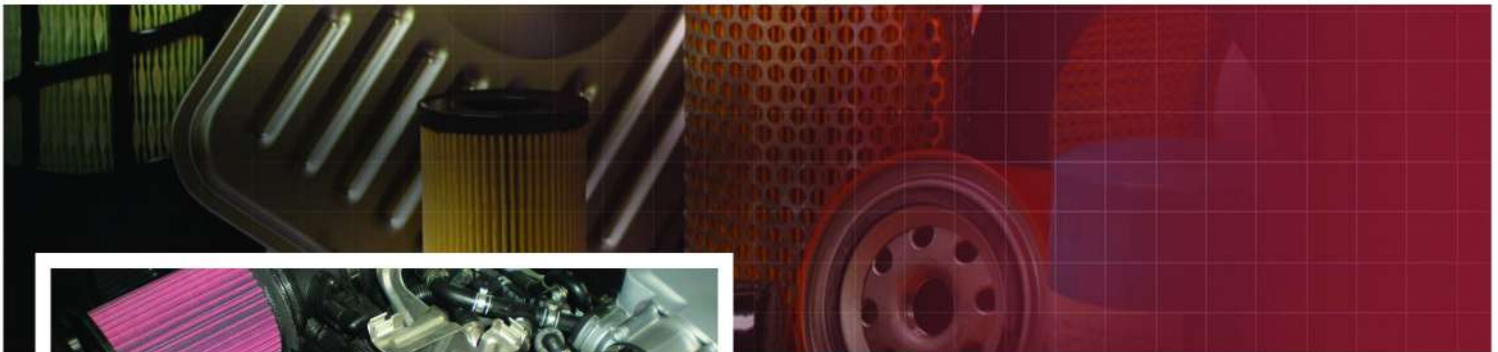

VISION

We at Prowess Industry aim to become the market leader of excellent air, fuel and oil filter provider with an aim of making it the most successful brand manufacturer and supplier to the required company in the nation of OEMs matched filter industry through the quality, effectiveness and time saving ways of the product along with specific guidance and brief explanation of the unique advantages of it.

ABOUT US

Eager to obtain most successful and effective quality filters for all vehicles at an affordable and reasonable price from one of the best nationalized provider and innovator of the excellent filter with its most unique and recognized platform!

"Welcome and use the National platform of Prowess Industry."

Prowess Industries is a Delhi based manufacturing company specialized in the manufacture of excellent quality, high performance all kind of air, oil, fuel filters for all type of vehicle. The Constant effort of Innovative Team of engineers at Prowess Industries is the pillar to cater the most unique filters matching OEMs for specific vehicles to all over the India.

Prowess Industries is one of the most widely verified, accepted and sought-after manufacturer & suppliers of filters in the vehicle industry. Since its foundation, Prowess Industries has devoted extensive research and efforts to manufacture excellent and standard air, oil and fuel filters for all vehicles and make the company unique while being flexible to constant changing process & technologies. Using the expert experience, the company has manufactured and supplied thousands of specified and unique filters to vehicle manufacturing companies and individuals to grow at its maximum level and stand out in the market.

Uniqueness:

The Unique research, on OEM filters under quality wise specification by the Prowess Industries, is the reason of the company's reputation. It achieves the high expectation of its clients and excel in the market by becoming one of the best manufacturer of all kind of air, oil, filter filters for different vehicle.

- All the quality filters are exclusively manufactured at the company
- Non complicated easy installation
- Perfectly finished product
- Maximum efficacy
- Through diversity company is able to manage the target at its utmost confidence.
- Assured upgraded quality with continuous and invert testing for excellent performance of the filters.
- Assured maximum functional activity of the quality filters.

The success of **Prowess Industries** is mainly executed, determined and achieved by dedicated teamwork, individual excellent performance and growing & upholding customer satisfaction which increases close relation with its customers and execute the urgency to fulfill customers' continuously changing needs.

We have our complete faith and belief in the motto of our company and pride with our excel execution of providing high quality filters and serving individuals and multinational companies at most reasonable and affordable price on time with a true, honest and transparent practice.

REASON TO CHOOSE

As a complete provider of air, fuel and oil filter, we specialize in each and every process of manufacturing, packaging, testing and providing filters in such a way which make us unique and different from others in the market.

- ▶ Full line manufacturer and distributor of all types of air, fuel and oil filter for all types of vehicle.
- ▶ Cost-effective and high quality filters are provided.
- ▶ Filters are assured to be functional at its maximum level for longer time period.
- ▶ Knowledgeable technical staff and vast product inventories makes us unique and available for anytime when you need us.
- ▶ Exemplary customer service and on time delivery make us different from others.
- ▶ Our reputation as a top manufacturer and supplier of filters makes us most trustworthy and important within the industry and in the market.

As per our motto of client satisfaction and building a long time professional relationship is the utmost priority, we constantly push ourselves to innovate, create, excel and master at each and every step of the company process through our expert team work and management.

AIR FILTERS

As clean air is required for smooth and trouble-free driving, air filters are needed to filtrate out the particles like soot and dust which present in the air and wear the piston and cylinder of the engine resulting in lower efficiency of engine with shorter life and higher fuel consumption. The excellent and high quality air filters provided by Prowess Industry ensure the efficiency of the engine by ensuring the performance data provided by the industry.

Availability

All the different type and parts of OEM matched filters are available at Prowess Industry. Among which Prowess industry specializes on:

- Cylindrical PU filter
- Panel type PU Filter
- Metal end cap filter
- Plastic Injection Molded

Efficacy

As internal combustion engine uses a vast quantity of air, the chances of accumulation of mass amount of contamination from the atmosphere are extreme. The air filter protect the combustion engine by

- Removing abrasive, carbon, aerosols and other components from the atmosphere before mixing in the engine.
- Saving pistons, rings, cylinder walls from getting damaged from contaminants.
- Enhancing and increasing shelf life of the engine by giving better effect on fuel economical consumption.

Prowess air filters minimizes the human error factor by intervening an operator.

The manufacturing process is performed according to ISO authorized quality check and procedure to make sure the outcome is faultless and matches the client's standards.

OIL FILTERS

For regular or everyday drivers performing routine maintenance on the vehicle, looking for maximum strength and protection for the old vehicles and excellent performance from a new engine, who required to keep and maintain their older vehicles properly running for a very long term or to get maximum output of higher mileage for a long time from their new car, urgently require the high quality and excellent oil filters to filter the contaminants present in both conventional and synthetic oil which is expertly manufactured and supplied by the Prowess Industry.

Functionality

The oil filters are extremely important to prevent the flow of contaminants, which may remain in the lubricating oil, from reaching and effecting sensitive engine parts without hampering normal oil flow.

Availability:

Among all the different types of oil filters we specializes in manufacturing and providing the high quality Spin on oil filter.

As the newly input oil can take the contaminants remained and trapped in old oil filter which can be re-circulated through engine's moving parts, Oil filters should be replaced along with the oil. Very frequent changes of oil filters are an economic and affective way to increase the efficiency and longevity of an engine.

Efficacy

- Able to filtrate out the foreign matters or contaminants present in the piston area.
- Increase the efficiency of engine performance.
- Oil filters able to help the oil to lubricate the engine's moving part in a smooth manner by removing the contaminants or dirt from the oil.
- The life expectance of the moving parts of the engine maximizes.

FUEL FILTERS

We at Prowess provide high quality Fuel Filters for all engines functioning with diesel, petrol & gasoline at a most reasonable and affordable price.

Because of the presence of heavy contaminants like rust, dust, water, scales, impure particles etc. in fuel, an engine working with petrol or gasoline can't be able to work properly and it can or may lose its power through which the engine can or may become ineffective to start properly and exhaust valves can get damaged.

While for the diesel engines, the high quality sophisticated, advanced injection equipment and fuel pump get badly affected because of the contaminants.

Though abrasive particle is the most damaging contaminant to injection system of a diesel engine but presence of water and dirt can also be extremely dangerous and disastrous for the diesel fuel injection pump.

UNIQUENESS OF PROWESS FUEL FILTERS

The high-quality Prowess filter efficiently able to save the drilled passage of carburetor by protecting the engine fuel through stopping the core passage getting blocked or clogged by contaminants.

Because of the presence of the filter, the efficacy of metering performance of an engine gets enhanced.

As all fuel entering the carburetor first passes through the high-quality filters, the half-life of the engine gets increased with an assurance of smooth and long engine life.

Prowess provide the most efficacy and high quality filters with an affordable, reasonable and competitive price.

The filters just not only filtrate all contaminants to save the engine but also stop the deterioration and corrosion of the tank's inner surface.

With the presence of highly efficient and fine fuel filters, fuel flows under the most complex condition.

Prowess filters improve, enhance and increase the performance of a diesel, petrol or gasoline engine and reduce the toxic emission.

QUALITY ASSURANCE

We at Prowess Industry assure high quality of air, fuel and oil filters with the complete assurance of maximum functional activity. We constantly check the quality of each and every step from the manufacturing process, packaging to delivering on time at the client's destination to create the end product as one of the most qualified and renowned in the market.

The quality of the filter at Prowess Industry is checked and assured through a systemized and rigorous process of scrutiny or inspection,

1. First, all the raw materials are quantified and checked thoroughly to evaluate the quality of it.
2. Each and every Parts and products of the filters are tested for its reliability and performance before manufacturing.
3. Then all the filters are manufactured as per their specific OEM requirement.
4. After completion of manufacturing the filters are checked and tested to see any faults and the quality i.e. whether they can attain their maximum efficiency or not.
5. After quality checking, filters are packed for the delivery.
6. Before delivering all the packed filters are checked finally and thoroughly for the last time.
7. Then the filters are delivered carefully to the specific location given by the specific clients on time.
